WE ARE WHAT WE REPEATEDLY DO.

excellence

THEN, IS NOT A SINGLE ACT BUT A

HABIT ARISTOTLE

WELCOME TO THE WORLD OF EXCELLENCE. WELCOME TO CANARA LIGHTING.

Since 1972, Canara Lighting has been known for its excellence in products and service. From concept design to commissioning, we continue to provide the highest quality lighting products at the most competitive prices with the quickest turnaround time.

Our 10,000 sq.m. world-class manufacturing facility with state-of-the-art equipment functions at full capacity because of our committed team. We believe our excellence comes from our people.

We have over 1000 installations with the latest innovations in lighting running around the world - thanks to our brilliant technology team.

On the strength of our illumination specialists, we are future-focused with LED products, green product technology and digital control systems.

Canara Lighting works in close association with American & European lighting consultants to light up the world.

COME SEE THE WORLDS WE ILLUMINATE.

TV STUDIO

Imagine the shocking reveals of daily soaps with dim lighting. Not impactful, are they?

From daily news & soaps to the shopping network, Canara Lighting provides television studio lighting systems for all types of TV programs. Our list of products includes but is not limited to grid/rigging systems, DMX networks, dimmers, control panels, power systems, cable management and lighting console. We customize these products as per your unique requirements & site ambiance.

With technical knowledge and ample working experience, Canara Lighting conducts technical proposal discussions offering you a wide selection of lighting fixtures designed to suit your needs.

Detailed project designs complete with manufacturing and on-site installation, culminating with customer training and after sales service ensure 100% customer satisfaction.

FILM STUDIO

We put the 'Lights' in LIGHTS...CAMERA...ACTION!

Our expert lighting for film studios makes a scene look fantastic & actors extraordinary on-screen; in collaboration with makeup, of course.

Canara Lighting offers turnkey film studio lighting systems and design infrastructure consisting of catwalk, motorized/ fixed grid, DMX networks, dimmers, cable management & lighting console, customized to your specific needs. We have been at the forefront of the LED revolution by offering LED fixtures to replace traditional HMI lights in the film industry.

GLOBAL ILLUMINATORS

AUDITORIUM

What's the secret to a superhit theatrical play, fashion show or musical concert? Lights!

Canara Lighting has spent years mastering the art of stage lighting. We understand event lighting and how every requirement is unique, well enough to be the perfect stage partner for your event!

Our process starts with a site visit to get a clear picture of the project and the customer's requirements, thereafter designing stagecraft, lighting and drapery systems. Upon finalization and approval from the customer, the equipment is manufactured, tested and then installed on-site.

STADIUM

A sixer wouldn't be celebrated the way it is, if it couldn't be seen by the world, would it? A sporting event must be clearly visible to umpires/referees, spectators, media persons and most importantly to the audience at home.

Hence, Canara Lighting offers high-quality indoor and outdoor stadium illumination using the latest LED lighting technology. From project design, pole erection, electrical systems to light design, high mast, manufacturing and installation, we offer complete turnkey solutions for your stadium lighting.

ARCHITECTURAL LIGHTING

Facade Lighting, Musical Fountain, 3D Projection Mapping.

There are some structures that are so well-illuminated that it makes you look twice. That's the magic of architectural lighting. Canara Lighting provides architectural lighting solutions to enhance the image of any kind of building; residential, office buildings, temples or archaeological sites, by understanding the customer's illumination objectives.

We work with the latest technology in computer-simulated illumination solutions using customized software. From design to installation & training, we do it all. The best part? Our illumination solutions are based on green technology because, we care about Mother Earth!
